## The First Asian Symposium on Collaborative Software Engineering (ACSE 2017)

13 March 2017 – Tokyo, Japan

### Goal

The First Asian Symposium on Collaborative Software Engineering (ACSE) aims at providing a forum for researchers, practitioners, and educators, especially junior researchers and educators, to present and discuss their recent work and thoughts on software engineering, software testing, verification and validation.

As the first edition of ACSE held at ICST, it will provide researchers, practitioners, and educators with a forum for exchanging ideas, experiences, understanding of the problems, visions for the future, and promising solutions to the problems. To enhance the discussion/collaboration between researchers in software testing, verification and validation, as well as other domains of software engineering, this symposium covers all aspects related to software engineering.

### How to Submit

Each submission includes two parts: (1) abstract of the presentation, and (2) brief introduction of the speaker. For the first part, please submit a short introduction of the presentation (up to 1000 words). For the second part, please submit a CV. Both parts are necessary for each submission.

### Presentation Guides

Once accepted, the corresponding author/speaker is required to register for the symposium and make the presentation at the symposium.

### Important Dates

Deadline for Submissions: **December 1st, 2016**  
Notification of Acceptance: **January 1st, 2017**  
Deadline for Registration: **February 15th, 2017**

### Program Committee Co-Chairs

Nguyen Van Tang, Hanoi University of Industry, Vietnam  
Dan Hao, Peking University, China.
