

Call For Workshop Contributions

Goal

The IEEE International Conference on Software Testing, Verification, and Validation (ICST) is one of the premier conferences for research in all areas related to software quality. The conference has a history of hosting many workshops that provide a collaborative forum for participants to exchange preliminary results, conduct intensive discussions on a particular topic, and coordinate efforts between members of a technical community. We encourage those interested in organizing a workshop to submit proposals focusing on all aspects of software testing, verification, and validation. These will be IEEE workshops, and organizers have the option of publishing the proceedings in the IEEE digital library.

Important Dates

Submission of Proposals: **October 7th, 2016**
Notification of Acceptance: **October 21st, 2016**

Process:

Proposals should provide the following required information. Further details and templates are provided on the conference website:

<http://aster.or.jp/conference/icst2017/workshops.html>

(1) Title, (2) List of organizers and contact information, (3) Workshop Theme, (4) Goals, and Relevance, (5) Success Indicators of Previous Editions, (6) Organization, (7) Workshop Format, (8) Workshop Scheduling, (9) Plan for advertisement, (10) Workshop Short Description, (11) Paper Selection Procedure, (12) Publication Plan, (13) Expected Participation

Submission: Submit your workshop proposal to the workshop chairs via e-mail and in PDF format to:

Wei Le (weile@iastate.edu)

Myra Cohen (myra@cse.unl.edu)
